

BUSINESS CHALLENGE

The client's rapid expansion through acquisition **doubled** their number of managed ships to 550.

They needed an application **ASAP** to efficiently manage hundreds of port services for their ships.

Vendor estimated **\$1M - \$2M** and **1.5 to 2 years** of development - time they simply didn't have.

APP REQ & SPECS

Requirement:

A Multi-Tenant SaaS Application to manage Port Service Agencies across the world.

Application Specs:

- **5** Large Modules
- **18** Complex Workflows
- **85** Diverse Business Objects
- **359** Unique Business Actions.

MAHAT PERFORMANCE

- Team Size: 4 people
- MVP: 7 Days
- First Module: 4 Weeks
- Final Release: 9 Months
- Cost: 70% less

"Mahat allowed us to launch efficiently, saving significant costs, time, and reputation. The ROI from this app has been the best we've seen in years."

BUSINESS CHALLENGE

Client's heavy vehicles in large mines incur **huge costs and delays** significantly cutting ROI.

They needed IOT devices and an application to efficiently manage **hundreds of heavy vehicles** and their drivers.

Off-the-shelf devices and apps **just don't meet custom needs** but are already costing a lot.

APP REQ & SPECS

Requirement:

Complex IOT Devices and a Multi-Tenant SaaS Application to efficiently monitor, signal and improve dozens of vehicle and driver parameters.

Application Specs:

- **9** Large Modules
- **28** Complex Workflows
- **130** Diverse Business Objects
- **563** Unique Business Actions.

MAHAT PERFORMANCE

- Team Size: 4 people
- MVP: 10 Days
- First Module: 6 Weeks
- Alpha Release: 3 Months
- Cost: 75% less

Mahat was able to show an MVP, finalize the full scope and start delivering in a few weeks. No one matched their speed, quality, cost, and delivery."
- Mahesh, CEO, DeepWorks

BUSINESS CHALLENGE

Client's film pre-production work was in **complete disarray** with multiple delays and confusions.

They needed an application that streamlines **multiple departments**, roles and processes.

Ready made apps were large with feature-bloat, **less custom options & costly in the long run.**

APP REQ & SPECS

Requirement:

A Multi Tenant SaaS Application that super-efficiently manages the complexity of pre-production work often involving continuous reworks and approvals.

Application Specs:

- **5** Large Modules
- **16** Complex Workflows
- **73** Diverse Business Objects
- **310** Unique Business Actions.

MAHAT PERFORMANCE

- Team Size: 3 people
- MVP: 4 Days
- First Module: 2 Weeks
- Full Release: 8 Weeks
- Cost: 60% less

Following an MVP, the full application came alive like a movie - scene by scene, surprisingly in the same time frame it takes to release a short movie.” - CEO, ShootingSimplified

HEALTH CHALLENGE

Community members had strong intention for a healthy lifestyle but **struggled with practice.**

They needed an application to **onboard, educate, track and support** a healthy life style for their health community members.

Assembling opensource apps or subscribing to multiple SaaS apps was **not practical.**

APP REQ & SPECS

Requirement: A custom app to manage educational content and events, manage membership, assign individualized health plan, track daily practices and give reminders and recommendations.

Application Specs:

- **3** Modules
- **9** Workflows
- **34** Diverse Business Objects
- **140** Unique Business Actions.

MAHAT PERFORMANCE

- Team Size: 2 people
- MVP: 3 Days
- Full Release: 3 Weeks
- Cost: 65% less

“It initially appeared that we needed three applications. Mahat was able to combine them into one very fast with fully tailored features.”
- Founder, aKama.life

9 Workflows that manage multiple aspects of onboarding customers, managing health events, complete customer health support and more.
